# Python

**The Jupyter Book community**

**Jul 22, 2021**

I'm Isabela (she/her), UX/UI designer officially and a professional question-asker by self-proclamation. You may also know me as an admirer of the color orange, proponent of floral patterns, and generally curious person.

I'm fortunate to work at Quansight Labs and spend most (but certainly not all) of my time in the JupyterLab and Spyder communities. Accessibility, community, and supporting new and underrepresented people are a few of the things that matter to me.

A few places on Github you might find me are jupyter/accessibility and spyder-ide/ux-improvements.

It's nice to meet you! Feel free to reach out by leaving an issue on this repo.
